

STUDENT NEEDS AND/OR LIMITATIONS

In providing the safest possible transportation for students, the Board recognizes the need for Bus Drivers to have the availability of all pertinent student information which will aid the Bus Drivers in appropriately assisting or disciplining students. To that end, the Board directs the Administration to develop and implement procedures that would make available, to District Bus Drivers, pertinent confidential student information, concerning particular student needs and/or limitations, whether they be physical or mental. Development of these procedures should involve discussion with, and recommendation by, other District personnel directly associated with the students' needs, e.g., Committee on Special Education, School Nurse, School Psychologist, etc.
